Subject: Dimock Residential GW Site Preliminary Results

Preliminary results for the Dimock Residential GW Site are included in the attachment. Included are results on the priority constituents from all labs, where available. Level of certainty is provided when results are above screening levels.

Updates:

HW01 results for all expedited compounds have now been entered into the prelim report. Additional ethylene glycol, methane and total coliform entries (all indicated as below trigger level) added to table.

Results at or above trigger levels (updated since 2/9/12):

Metals:

Sodium: Several samples have sodium results above trigger levels (HW34a, HW34a-P, HW39, HW39-P, HW40, HW40-P, HW41, and HW41-P).

Report Files:

A separate email will follow with final reports that have been placed on the R03FTPUser site in directory EPA Laboratory.

Please contact me at 410/305-2732, or Robin Costas 410/305-2659, if you experience delivery problems with this report. A copy of this e-mail will be retained in the case file.
